1 BY DANIEL ADAMS: I'm opposed to the  
2 storage of waste at Yucca Mountain. I'm proud of  
3 this state and while more economic diversification  
4 is needed, I do not think it is the right  
5 alternative for no other reason than creating the  
6 impression that we are nothing but gambling and a  
7 place for spent nuclear fuel that other states are  
8 not willing to take their own responsibility for.

9 I strongly believe that if a state  
10 chooses to have nuclear energy, that that state  
11 has the responsibility to dispose of it in its own  
12 boundaries.

13 If that state feels that the  
14 disposal in its boundaries is too dangerous, then  
15 it is too dangerous for it to have nuclear plants  
16 and should not have them.
